image001.png Scope of Work_EPA Memo_AD.pdf

Frank,

As we had discussed earlier in the summer, BASF completed additional sediment sampling and analysis for total PCBs in the Pawtuxet River, adjacent to the former Production Area at the BASF Cranston Site. We have attached a memorandum that contains a data summary from this sampling event as well as a scope of work for completing a sediment removal before the end of this calendar year.

Thank you for your attention to these activities and please do not hesitate to contact me if you have any questions or comments regarding the attached memorandum.

Regards,
Joanne Lynch
